ASHISH PATIL

Pune | +91-7058568096 | ashishtp2005@gmail.com | LinkedIn | Github | Portfolio

Summary

Third-year Computer Engineering undergraduate with strong foundations in Data Structures & Algorithms, Object Oriented Programming, and core computer science fundamentals. Experienced in building scalable full-stack web applications and real-time systems using modern technologies such as React, Node.js, and cloud services. Demonstrates strong analytical and problem-solving abilities through competitive programming and hands-on project development. Highly motivated to contribute to backend systems, software development, and production-grade technology solutions in fast-paced engineering environments.

Technical Skills

Languages: C++, Java, Python, JavaScript, SQL
Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Framer Motion, HTML5, CSS3
Backend: Node.js, Express.js, FastAPI, RESTful API Design, WebSockets, JWT Authentication
Database: PostgreSQL, MySQL, MongoDB, Firebase
Cloud: Google Cloud, AWS
Tools: Git, GitHub, n8n (Workflow Automation), Vercel, Figma
Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

KodeBattle - Competitive DSA Arena | *React.js, Node.js, Firebase* Jan 2026

- Developed a **full-stack web application** using **React.js** for frontend and **Node.js** for backend APIs, focused on real-time 1v1 competitive coding battles.
- Designed and implemented **scalable backend logic** for matchmaking, KOD rating calculation, and match history persistence using Node.js.
- Implemented debugging, validation, and testing strategies to ensure reliability of matchmaking and rating systems.

Santulan AI - Wellness & Productivity Platform | *React.js, Node.js, Firebase, n8n* Dec 2025

- Built a **production-style full-stack web application** using **React.js** and **Node.js** to manage personalized user routines and productivity workflows.
- Designed intuitive user journeys and **interface layouts** for productivity workflows with a focus on usability and clarity.
- Implemented **secure authentication, database schema design, and API integrations** using **Firebase**, ensuring data consistency and reliability under concurrent users.

CET Buddy - MHT-CET College Predictor | *HTML, CSS, JavaScript, Python* July 2025

- Built a data-driven college prediction web application using **Python-based statistical analysis**, processing 54,000+ historical MHT-CET cutoff records to suggest suitable colleges for aspirants.
- Implemented **efficient filtering and search algorithms** in **JavaScript and Python** to handle multiple user-defined criteria, significantly reducing manual research effort and improving prediction relevance.
- Focused on **structured data handling, performance optimization, and scalability**, enabling reliable predictions even with large datasets.

Research

Academic Certificate Verification using AI and Blockchain Nov 2025 - Present

- *Contributed to designing user-facing workflows for certificate upload, verification, and result display.*
- *Focused on usability and clarity in presenting verification results and system feedback to end users.*
- *Designed a blockchain-based hash anchoring system for tamper-proof verification.*

Education

Pimpri Chinchwad College of Engineering Pune, Maharashtra
Bachelor of Technology (B.Tech) in Computer Engineering | CGPA: 7.75 *08/2023 – Present*

Achievements

- Solved 400+ DSA problems on Leetcode, Codechef and Codeforces reflecting consistent competitive programming practice and strong problem-solving skills.
- **Finalist**, **Top 50**, Amalthea Hackathon (IIT Gandhinagar × Odoo) competing among teams nationwide.
